## 1. Planning For Your Vacations: Useful Tips

It's that time of the year when you and your wife sit and decide as to where you can spend some quality leisurely time with each other as well as with your kids! It's vacation time folks! A time for fun and relaxation! Get ready to pack your bags and put behind all your worries and tensions to enjoy a great vacation!

To make your vacation trip a roaring success and devoid of any unnecessary hassles/tensions, the word of wisdom coming down through ages is to plan out each and every minute details related to your vacations well in advance. Here are a few useful tips that will help you plan your vacations in the proper way:

- The first and most vital aspect about vacation planning is to plan out your budget. You can decide on the vacation destination depending on your travel pocket! So if you have fat pockets then you may plan out a luxurious vacation at some exotic destination putting up at 5-star accommodations and driving around in rented limos! But for the not-so-lucky mortals who have restricted budgets you can plan out some great vacations at cheaper budgets to less expensive locales and have a great time without putting too much strain on your pockets!
- Make all airline bookings 90 days in advance that will guarantee you reserved seats. So if you are planning for a vacation in December you must book your flight tickets in September!
- You can avail cheaper flight rates and heavy discounts on airfares, hotel bookings as well as on car rentals if you book early! Keep this in mind while planning a more economical vacation!
- Check on your passports and visas to ascertain whether they are all renewed properly or not. This is very crucial especially when you are traveling to a different country altogether. If your passport is due to expire within the next 6 months you might not gain entry into some countries!
- While vacationing in a different country if you have the desire to drive around the town on your own make sure that your driving license is certified and renewed. You must possess a certified international driver's license that permits driving in any part of the world.
- After you have decided on your vacation spot try and gather as much information as you can about that place from the city/state tourism departments. There are numerous informative travel sites on the Internet to check out. You can ask friends and relatives who have already visited the vacation spot before about the interesting places, activities, and other exciting facts to check out for at that destination!
- While booking your rooms at any particular hotel clarify all terms and conditions regarding

the hotel's policy on 'guaranteed late arrival!' This ensures that you are not left in the lurch if you somehow check in late well past the check-in time of the hotel!

- Plan out all the essential items that you will need to pack. So it's best that you draw out a packing checklist before you start to pack your bags mentioning what type of clothes, footwear, skincare products, swimsuits, hats, warm jackets, and the list goes on you need to pack depending on the destination you are heading to for your vacation!

### 3. Travel Insurance: Do You Need Some?

The word "travel" conjures up some beautiful and exciting feelings of adventure, fun, frolic, leisure and relaxation! In this fast moving world where people are simply running from pillar to post in search of the so-called 'perpetual happiness' they sometimes realize that "hey! Even I need to chill out and relax, have fun with family and friends!" So traveling to various places for vacationing and adventure becomes a good option.

Whatever might be the reason for one's traveling to different places, we have to admit that it does include a certain degree of risk. You might ask "what sort of risks?" Well if you talk about 'risks' then there are many! God forbid!

- You might not feel too well sometimes while traveling and you end up in a hospital with some serious illness 'All Of A Sudden'!
- What if the vehicle you are traveling in runs into an accident and you are seriously injured!
- You hurt yourself while 'Scuba-Diving/Surfing'...a sad end to your exotic adventure in some happening island!
- A plane-crash!!!!!!!
- 'Terrorist-Attacks' seems to be the new age mantra that can spoil your traveling experiences totally!

So we may conclude that one needs to safeguard his/her life while traveling whether for leisure or something more serious and important. As we know that prevention is better than a cure, so why not making some concrete provisions for your own safety while traveling.

Travel-insurance covers more or less the various aspects of your travel to insure your full safety while traveling. Different types of travel-insurance policies have been chalked out and are readily made available by various insurance companies all over the world.

You just need to check out the various insurance plans and carefully go through the details and choose a policy as per your need.

Most people's health insurance does not cover them when traveling outside of their home country. Unforeseen medical expenses can be very costly and it can be difficult in finding the best treatment in an unfamiliar area. Most travel-insurance companies will help you find a doctor who can treat you or they will evacuate you out of the country to the next place that can.

Most travel-insurance companies try to provide their customers insurance plans at cheaper rates that offer convenient high value cover at low prices! So you might land yourself with a real good deal that will surely make your traveling more safer.

Lastly, not every traveler wants or needs travel protection. But every traveler should know how to evaluate the risks involved in any trip from home and the plans that are available to cover those

Useful Resource: [Save 50% On Flights](#)

Useful Resource: [Are You Overpaying For A Disney Vacation?](#)

risks. Unfortunately, there is no such thing as a best plan for everybody. Choosing a plan based on price alone or on the recommendation of a travel agent may leave you without the coverage you need. And buying a plan that does not cover the risks that are unique to your situation is not much better than buying no plan at all.

## 4. Cheap Airfares: How to Find the Best Deals?

To make your travel experiences more economical and pocket-friendly you must search for the best deals while booking your flight tickets! Cheap airfares can cut down your travel expenses to a great extent. So you can enjoy your vacations and cruises a bit more luxuriously with that saved money in your pocket.

To find the best deals on cheaper airfares you have to put in a little effort. In the first place you've got to decide your exact budget for your upcoming escapade. If you have enough funds to go for a luxurious and grand traveling expedition then you won't bother much about the price of airfares. But for the budgeted traveler cheaper airfares are always a wise option.

You've got to scour the internet to find the best deals on airfares. There are innumerable travel websites offering comparative price charts listing the numerous low-cost airlines and the kind of services they provide. It's quite a daunting task to select the best deal from such a vast collection of airfares. You definitely need a systematic foolproof system that will remove all your confusions while finding the best deal on airfares at exceptional prices.

You can visit the various multi-purpose travel sites online where you can find flight tickets at cheaper and discount prices. You can choose the particular airline that serves the destination you want to visit. This is your one-stop shopping zone for cheaper airfares.

However don't be too hasty in deciding right away on a deal at these travel sites when you need a still better bargain. A few low-cost carriers are sometimes not included in the price list of these travel sites and you might just lose a better deal if you ignore these. So it's advisable that you search on for better and cheaper deals until you find one that suits you perfectly. You can check out the official websites of some top low-cost airlines directly. Most airlines offer special discounts, attractive travel packages and cash-saving frequent-flier miles that are not applicable when you book their services through any travel site/online travel agent. Also, you can avoid paying the extra charges that some online travel sites add on to your ticket prices as a fee for their services.

While looking for cheaper airfares you should avoid booking the tickets over phone through a booking agent. There are some airlines that charge extra for this service.

You can also grab a good deal on last-minute bookings of your air tickets in case of emergency. Sometimes if you are lucky you can get the lowest prices ever on such last-minute flight bookings.

- Then you need to plan out on who shall accompany you on the cruise. It can be a Family cruise vacation/Honeymoon cruise vacation/All-girls or All-boys cruise vacation and so on.
- Next thing to decide upon will be your cruise destination. Where exactly you want to cruise to and which kind of cruise liner appeals to you. So you've got to do a bit of detailed research surfing through the Net and looking through various cruise sites. Gather all the necessary information regarding the cruise destinations, the kinds of cruise ships heading to those destinations, the period of journey, the entire cruise itinerary, the prices and discounts, places covered by the cruise journey and other essential cruise details that you've got to check up prior to your cruising expedition.
- You can choose from a Caribbean cruise or an Alaskan cruise or a South American cruise or an exotic Trans-Atlantic cruise and many more cruise destinations around the world, whichever appeals to you and excites you more! Check out which kind of cruise liners serve these destinations online or through travel consolidators.
- Check out the various features and amenities, activities and entertainment options, etc. offered by the different cruise ships that will help you decide on the best one to take you to your dream destination amidst lots of fun and excitement.
- After you have selected the cruise ship that you want to travel in, the next thing to plan out is what category of cruise ship cabin is ideally suited for you in terms of your budget and tastes. Choosing the right kind of a stateroom on a cruise ship can be quite challenging what with so many different categories of cabins that are offered on all cruise ships.
- The best advice on planning out the ideal cabin for yourself is that you collect information about the various kinds of cabins available in the cruise liner you want to go in either online or from printed brochures. Then decide upon one that will suit your budget and style.
- Planning out on the port of departure is essential. This will help you to save money and

time together. So it will be better if you could check up with the cruise liner as to which are it's home ports. Selecting a port nearer to your hometown saves you a lot of expenses on airfares or car fuel.

- You will also have to plan out on the types of clothes and dresses you want to pack in your cruise luggage. Mostly the ambiance on board of a cruise liner is very casual and fun-filled but you cannot avoid a few formal dinners or gala nights where you have to dress up in evening gowns, sexy dresses, formal jackets and tuxedos! So pack clothes and accessories accordingly.
- Planning for a cruise vacation essentially includes preparing a packing checklist that will point out as to what you need to pack, how you need to pack and how much you need to pack for a successful and tension free cruise vacation.

## 8. Packing For A Cruise Vacation: Some Useful Tips

The time has come finally to embark on that exotic cruise vacation anticipated by you and your family for so long! To make your cruise vacation all the more enjoyable you've got to get your packing right.

For those of you who are more organized and believe in pre-planning your vacations including the packing, then the following tips will help you out with the packing hassles prior to a cruise vacation.

- You must pack all the essential medicines and a first-aid box in such a way so that they are handy in times of emergency. You would not want to tear apart your luggage to find a particular painkiller. Keep this bag of medicines and first-aid along with you in your handbag.
- You can pack some magazines, comics or novels that often prove to be useful while waiting at the airport.
- At the cruise terminal you will need your cruise tickets, transfer vouchers (from the airport to the ship) ready in hand. So pack them in your handbags and not in the suitcases or other luggage.
- Cruise vacations are a bit different from normal vacations. After you board the ship it might take several hours before your entire luggage gets delivered to your cabin. So what do you do if you move on from a colder weather when you left home to a warmer atmosphere in the cruise ship? Keep some lighter clothes handy inside some soft luggage that will be with you throughout. You can't afford to wait till the arrival of your complete luggage.
- If you are a fitness enthusiast then probably you would not wish to miss out on your daily exercise and workout routine even on your cruise vacation. So don't forget to pack your fitness clothing and shoes, etc.
- Using waterproof zipper top bags for your cruise packing helps to keep your clothes and other belongings dry. Helpful if it starts pouring while your luggage is being moved into the ship from the airport.
- Always pack suitcases containing both 'his' and 'hers' garments and accessories together in each suitcase. If you are traveling with your kids then pack some of their clothes along with yours too. In most cruise vacations there occur at times terrible mix-ups where your entire luggage doesn't arrive together. In such situations, a single suitcase containing some clothes and accessories for everyone provides temporary relief till the other bags arrive.
- Sunbathing is an enjoyable activity on board all cruise ships that are provided with lines of

Useful Resource: [Save 50% On Flights](#)

Useful Resource: [Are You Overpaying For A Disney Vacation?](#)

deck chairs on the decks and around the swimming pools. So take care to pack in your sunscreen lotions, sun hats, and dark glasses.

- Pack loose and comfortable clothing for day wear on the ship. Nighttime on the cruise liners are often exciting enough to keep you up till the wee hours of the morning. Las Vegas-style shows, Broadway-style skits, karaoke, piano bars, discos, dancing, casinos and jackpots will all add to your cruise ship experience. Keep these activities in mind while packing your clothes for a cruise vacation.
- Casual clothing should predominate your packing list, rather than heavy formals, as the ambiance on a cruise ship is normally light and informal. However don't forget to pack a few formal gowns, dresses and pantsuits for 'her' and diner jackets/tuxedos, ties and bows for 'him' if you're planning to participate in a formal party on board.
- For those wonderful shore excursions that are real fun while cruising you must pack your cameras without fail to capture pleasant memories forever. Pack suitable equipments and accessories to enjoy the beach activities such as snorkeling, sailing, kayaking, para sailing and many other types of water activities. Make sure you plan for these on your packing list.
- A hundred different persons on the same cruise ship might possess the exact types of suitcases and luggage as yours. What do you do to prevent an identity/ownership crisis? So as not to make a mess of it all, the best method is to attach unique identification tags in the form of colorful tapes, labels, straps or scribbling an identification mark/ name of your choice on the face of your luggage.
- Another essential requirement while packing for your cruise vacation is keeping handy a few meters of duct tape. After you have packed up all your suitcases and luggage, wrap them up with duct tape. This keeps your luggage absolutely 'shut' even if there is a zipper malfunction or broken hinges that are so regrettably common.
