Home business newsletter set

Hello,

And thank you again for your purchase of the home business newsletter set.

Customizing the messages is easy.

Use these copy and paste codes below to search through your messages and insert your personal information.

In most text editors under the edit or search menu you will find the "find" or "find and replace" feature. Simply copy the sentences in quotes below to make customizing your messages fast and easy. Make sure to include the quotation marks.

All of your messages will open up in your favorite text editor. All of the messages are numbered for easy access. If you are looking for a specific message just type the number into your find feature. This will make to your autoresponder uploading much easier.

That's it your letters are all customized and ready to plug into your autoresponder.

P. S. I have added some extra tips for making your messages better and more profitable below.

ALSO NOTE: that you are responsible for following the anti spam laws. It is illegal to send unsolicited email. Make sure you check with your auto responder service to find out what you need to insert into your messages so that you comply with the laws. Always make sure you include an easy unsubscribe option.

You may also want to visit to learn more about complying:
<http://www.ftc.gov/bcp/online/edcams/spam/business.htm>

----- Codes -----

"autoresponder code here"

(Replace with the code from your auto responder service that will insert your contacts first name. ie {firstname}, \$FIRSTNAME ect.)

"add your name here"

(replace with your full name)

"your first name here"

(Replace with your first name)

"your email address"

(Replace with your email address)

"your URL here"

(Replace with your URL)

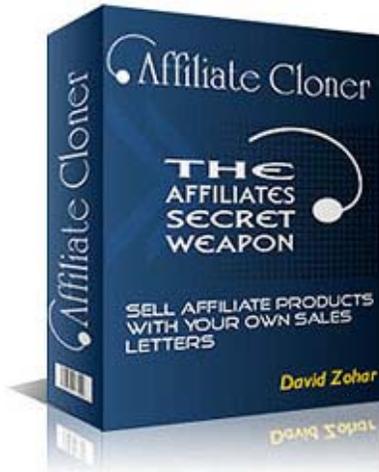

"xxxxxxx"

(replace with you clickbank ID)

----- End codes -----

Tips:

First thing I recommend you do after you have customized the letters is shrink the Clickbank URLs so that they are easier for your readers and safer for you. You can use a tool like the Desktop URL Shrinker or one of the many free services that are available, like <http://tinyurl.com>. This will make it harder for wood be thieves to steal your commissions. Or you can use one of the best tools to hide and cloak your affiliate links with the [Affiliate Cloner](#) tool.

[You can read about this Tool right Here.](#)

Next, I suggest you take some extra time and add your own offers. Throw in some freebies. This of course isn't necessary, the messages are all ready to plug in and go after you have customized them. But if you take the time to add your own personality and offers to the messages it will help you build a stronger relationship with your readers.

After that is all done and you have plugged your messages into your autoresponder then it will be time to start promoting your newsletter. Here are some things you can do.

- Add your newsletter to one of the many newsletter directories available online.
- Add a subscription form to your web pages.
- Put a note in your messages asking your subscribers to tell a friend.
- Run some pay per click ads or ads.
- Turn your issues into an RSS feed and add them to your my Yahoo account this will help get your site spidered more.
- Rewrite some of the articles and submit them to several article directories. This will get you nice links back to your site. Add them as content to your website or blog. Just make sure you change them by adding, removing or rewriting them. You don't want to take a chance that you will get penalized for duplicate content.

Most of all use your imagination and creativity to make the messages unique to you and your business this will help you build a strong relationship with your readers!

Best of luck,

admin@resellfire.com
